Bauder Sealant Kit - Price drop

Significant reduction in list price

Bauder is continuously monitoring its product portfolio and has identified an opportunity to offer an improved sealant offering.

What has allowed the price reduction?

As part of our internal procedure, our Product Managers regularly review the product portfolio to ensure that our products and systems offer the most up to date and appropriate technology.

The Bauder Sealant Kit has been identified as one area for improvement, to make way for a new sealant product which will complement a new counter-flashing system planned for launch in Q1/Q2 2026. The new reduced price of the current sealant will be reflected in the price of our new sealant product to be launched next year.

How much is the price reduction?

The price of the Bauder Sealant Kit, which consists of 25 x 380ml cartridges + 1 x 500ml tin of sealant primer has been **reduced from £345.22 to £248.50**. This offers excellent value for money.

Where should Bauder Sealant be used?

Please refer to our installation Guides and project specific specifications. These call for Bauder Sealant wherever it is required to be used.

When does this price reduction take effect?

The new price is available with immediate effect

Richard Clennell
