Rollers for LiquiTEC and LiquiTOP

Supply of rollers extended to LiquiTOP

We are extending the supply of rollers to our LiquiTOP range and also changing the pricing structure of the consumables used for our cold applied liquid systems.

Outline of Changes

The type of roller used for installing cold applied liquids can have a marked effect on the aesthetic quality of the finished waterproofing with some generally available rollers causing problems with air entrainment in the coatings as they are applied.

The rollers we currently supply for LiquiTEC projects have been tested and are now approved for use with our LiquiTOP products. Therefore they are now to be included in the LiquiTOP Price List along with compatible roller handles.

To ensure best value, we have also reduced the price of the rollers and other consumables in the LiquiTEC Price List. These changes will be included in the September 2023 LiquiTOP and LiquiTEC Price Lists. The rollers will be available for LiquiTOP projects from the beginning of September 2023.

Please feel free to contact me if you have any questions.
