

CONTRACTOR UPDATE

BauderRock NC 56mm Uprand Insulation

Bauder Ltd are pleased to announce as per our ongoing commitment to providing up to date solutions for our Approved Contractor Base our NON-COMBUSTIBLE Uprand Insulation option.

BauderROCK NC 56mm Uprand Insulation Board is a **non-combustible** uprand board used to thermally insulate and protect uprand walls in inverted flat roof systems.

It consists of a dense mineral wool insulation slab bonded to a rigid 6mm exterior grade fibre cement board, this combination of two non-combustible products provides an impact and weather resistant insulation for inverted roof upstands including to and across party walls.

Intended Use

Designed to protect and thermally insulate low level vertical installations.

Advantages

- Non-Combustible insulation bonded to non-combustible facing board
- Provides thermal break at base of uprand
- Impact and weather resistant
- Easy to handle and install
- Compatible with all Bauder Waterproofing Systems
