UPDATE

BauderSOLAR F Mount Phase-Out

We would like to inform you of an upcoming change to the BauderSOLAR mounting range. Following recent supply changes, the BauderSOLAR F mount system will be phased out with immediate effect.

Due to significant pricing increases and revised minimum order quantities, the BauderSOLAR F mounts will no longer be available for new orders.

All orders already placed will be honoured; however, no further orders will be accepted. After these have been fulfilled, a small quantity of residual stock will be retained for contingency and replacement purposes on existing installations only.

Please note that the BauderSOLAR F XL system remains unchanged and will continue to be available as our primary solution for flat roof PV installations.

We recommend that all future project specifications and enquiries are based on the BauderSOLAR F XL system. Our technical team is available to support with system selection and specification updates where required.

If you have any questions, please don't hesitate to get in touch.
