

Contractor UPDATE

Date: March 2022
No: 202204

Bauder Launch New Non-Combustible Pedestal as part of our expanded range

To aid specifiers who require a non-combustible roof terrace surfacing solution, Bauder have expanded our range of pedestal products to include an aluminium non-combustible pedestal. To enhance the range further Bauder have also introduced a simple low cost adjustable pedestal.

Bauder now has 3 types of pedestal design

NC – Non-Combustible Pedestal / PB – Simple Adjustable Pedestal / DPH – Slope Adjusting Pedestal

NC Non-Combustible Pedestal

The important introduction of a non-combustible pedestal gives a solution for fire sensitive locations. Typically used on “specified attachments” where non-combustible products are required such as high-level balconies. This all-metal product offers all the key features specifiers require for a roofing pedestal:

- Wide base plate
- Simple height adjustment
- Slope correction

NC Non-combustible Pedestal Range

For additional information on fire regulations and the use of products please refer to the Bauder update:

PB Simple Adjustable Pedestal Range

The PB range offers a lower cost pedestal to complement the existing DPH range. Both ranges come with a set of clever edge support details, spacers and other accessories

All Bauder pedestals have been designed with a wide base plate to spread load across the roof surface. The PB and DPH pedestal have a wide range of accessories (shims, spacers, joist holders and edging details) which enables various paving, decking and grating solutions. The DPH pedestal comes with built in slope correction which compensate for slopes of up to 5%.

DPH Slope Adjusting Pedestal Range
