

Contractor UPDATE

April 2023
No: 202301

New Parapet Outlets

To assist in reducing the number of parapet outlets required per roof area

Bauder are pleased to announce as part of its continued commitment to provide a comprehensive set of waterproofing accessories, we are launching some new outlets with improved flow rates & longer spigots for our RBM and Thermofol PVC Single Ply systems.

The new Bauder outlets available from beginning April 2023 are:

Bauder Bitumen Letterbox Parapet outlet DN 205 including stainless steel leaf guard. This product is supplied as standard with a stainless steel leaf guard and bituminous flange.
Part number GB14120210

Bauder THERMOFOL PVC Letterbox Parapet Outlet DN 190 including stainless steel leaf guard. This product is supplied as standard with a stainless steel leaf guard and an anthracite colour flange.
Part number GB14120200

These new outlets are launched as an addition to our current outlet range. Both of the new letterbox outlets have a spigot length of 600mm. The spigots will fit into most typically sized 250mm hoppers.

The RBM letterbox outlet has a flow rate of **2.02l/s**

The PVC letterbox outlet has a flow rate of **1.85l/s**

The membrane flanges on both products are fully compatible with the respective waterproofing membranes within each system and will therefore form part of the Bauder warranty that includes the waterproofing junction.

The letterbox outlets, complete with leafguards, will be delivered in a cardboard box.

In addition to the new letterbox outlets, we are also launching a new stainless steel circular spigot parapet outlet for RBM.

Bauder Bitumen Parapet Outlet DN 100 including stainless steel leaf guard.

This product is supplied as standard with a stainless steel leaf guard and bituminous flange.

Part number GB14120220.

With a spigot of 600mm this outlet has a flow rate of 1.06l/s. This is being launched primarily where a circular spigot is required for joining into pipework.

Parapet Outlet Pricing

These three new products will all be included within the next RBM & Thermofol price list update, but can be purchased with immediate effect. Please contact your local ATM or the Bauder Sales Dept for prices.

Drainage calculations

Bauder Technical Department can carry out drainage calculations when using Bauder outlets to determine how many Bauder outlets are required per roof area.

Technical Data Sheets and detail drawings

The new Technical Data Sheets and detail drawings for these products are attached with this Contractor Update.

If you have any questions please contact your local ATM or the Bauder Technical Dept.
