

# Contractor UPDATE

March 2026

No: 202618

## Bauder Refurbishment & Parapet Outlet Leaf Guards – change in appearance

For ease of identification and to aid our Site Technicians when inspecting Bauder projects, our leaf guards on the existing refurbishment outlets and parapet outlets will have the Bauder logo etched onto them.

### When does this come into effect?

From Monday 6th April, the option to purchase without the etched leafguard will no longer be available. The existing non-etched leaf guards will be phased out.

### What about projects already live on site?

These can be mix and matched as there is no technical reason why you cannot.

### Specifications and Pricing?

There will be no change to existing specifications.

Please refer to the latest version of the price list for the most up to date product pricing.

### Which products does this affect?

- **Bauder Bitumen Vertical Refurb Outlet DN70** with s-s leaf guard & mechanical seal.
- **Bauder Bitumen Vertical Refurb Outlet DN95** with s-s leaf guard & mechanical seal.
- **Bauder Bitumen Vertical Refurb Outlet DN145** with s-s leaf guard & mechanical seal.
