

Contractor UPDATE

Date: July 2021
No: 202107

Changes in Delivery Format Vegetation Blankets

There are changes in the size of blankets for both the Bauder SB and WB blankets. The changes in size will not affect the cost of the product.

Vegetation Blankets

Initially introduced as part of COVID safe working practice, due to the popularity of these smaller sized rolls, these changes are now to be made permanent for all deliveries.

To help workplace spacing whilst harvesting and laying, the size of each blanket has been reduced. Both the SB and WB Blankets are now harvested in 2m x 0.5m rolls (1m²). These are much easier to handle by individuals and reduce the need to have two installers working closely together.

Note: Due to the laying requirements of the Bauder XF301 lightweight sedum system will continue to be delivered in 2m x 1m rolls (2m²).

Please see below the details of the delivery details for all Bauder Vegetation blankets.

Product	Rolls Size	Quantity per pallet
XF301 Sedum Blanket	1m x 2m (2m ²)	30m ²

Product	Rolls Size	Quantity per pallet
SB Sedum Blanket	0.5m ² x 2m (1m ²)	36-40m ²
WB Wildflower Blanket	0.5m ² x 2m (1m ²)	36-40m ²
		Delivery Via Courier service will limit delivery to ¾ tonne limit
