### 5.2 Special hazards arising from the substance or mixture

Special exposure hazards arising from the substance or preparation itself, its combustion products, or released gases Violent polymerisation may be caused by: Extremes of temperature and direct sunlight. Fire will produce dense black smoke containing hazardous combustion products (see heading 10). Exposure to decomposition products may be a hazard to health.

### 5.3. Advice for firefighters

Special protective equipment for fire-fighting In the event of fire, wear self-contained breathing apparatus.

Additional information on firefighting Fire residues and contaminated fire extinguishing water must be disposed of in accordance with local regulations. Do not allow run-off from fire fighting to enter drains or water courses.

## SECTION 6: ACCIDENTAL RELEASE MEASURES

### 6.3 Methods and material for containment and cleaning up

Methods for cleaning up Soak up with inert absorbent material (e.g. sand, silica gel, acid binder, universal binder, sawdust). Clean contaminated surface thoroughly.  
Treat recovered material as described in the section "Disposal considerations".

### 6.4 Reference to other sections

Reference to other sections Disposal considerations See also section 13

### 6.5 Additional Information

Other information Treat recovered material as described in the section "Disposal considerations".

## SECTION 7: HANDLING AND STORAGE

### 7.1 Precautions for safe handling

Advice on safe handling	Processing may lead to evolution of flammable volatiles. In case of insufficient ventilation, wear suitable respiratory equipment. Keep product and empty container away from heat and sources of ignition. Handle and open container with care. Avoid contact with skin and eyes.
Precautions	Smoking, eating and drinking should be prohibited in the application area. For personal protection see section 8. Observe label precautions.

### 7.2 Conditions for safe storage, including any incompatibilities

Storage space and container requirements	Store in accordance with the particular national regulations. Keep in a cool, well-ventilated place. Keep in properly labelled containers. Containers which are opened must be carefully resealed and kept upright to prevent leakage.
TRGS 510	3
Recommended storage temperature	Keep in a dry, cool place.
Advice on protection against fire and explosion	Take precautionary measures against static discharge. Vapours may form explosive mixture with air. Use water spray to cool unopened containers.
