**Respiratory protection** Vapour during processing may be irritating to the respiratory tract and to the eyes. When workers are facing concentrations above the exposure limit they must use appropriate certified respirators.

**Remarks** Recommended Filter type: A1, A2 (in case of higher concentration)  
Use the indicated respiratory protection if the occupational exposure limit is exceeded and/or in case of product release (dust).

**Hand protection** Protective gloves complying with EN 374. Please observe the instructions regarding permeability and breakthrough time which are provided by the supplier of the gloves. Also take into consideration the specific local conditions under which the product is used, such as the danger of cuts, abrasion, and the contact time.

**Unsuitable material** woven fabric, Leather gloves

**Suitable material** Nitriles

**Material thickness** 0,38 mm

**Break through time** <25 min

**Eye protection** Tightly fitting safety goggles

**Skin and body protection** Wear suitable protective equipment. Long sleeved clothing

**General protective and hygiene measures** Handle in accordance with good industrial hygiene and safety practice. Keep away from food, drink and animal feedingstuffs. Wash hands before breaks and at the end of workday. Use protective skin cream before handling the product. Avoid contact with the skin and the eyes.

**Engineering measures** Ensure adequate ventilation, especially in confined areas. When workers are facing concentrations above the exposure limit they must use appropriate certified respirators.
