

Contractor UPDATE

December 2024

No: 202417

Bauder GRP Trim Angle

Additional size available which can be used with LiquiTEC and LiquiTOP Waterproofing Systems.

Bauder are pleased to announce we are launching a larger size for our Bauder GRP Trim Angle.

Bauder GRP Trim Angle will be available in a two sizes from November 30th 2024.

Why are we adding more sizes?

We felt this would be a good addition to our GRP Trim range to allow for more flexibility on perimeter details. Along with the existing 100mm x 60mm Trim Angle they are to be used on parapets and perimeter kerbs with an inward fall or as a drip trim to perimeter eaves details.

What sizes will the trim be available in?

The GRP Trim Angle will now be available in 2 profiles.

Trim Angle 100/60

Trim Angle 150/75

Prefabricated 90° Internal and external corners will also be available for both sizes.

Note that prefabricated corners will be available to suit the trim orientation, for example 150/75 or 75/150.

What lengths will the trim be available in?

The trim will be available in 3 metre lengths.

What colour will the trim be available in?

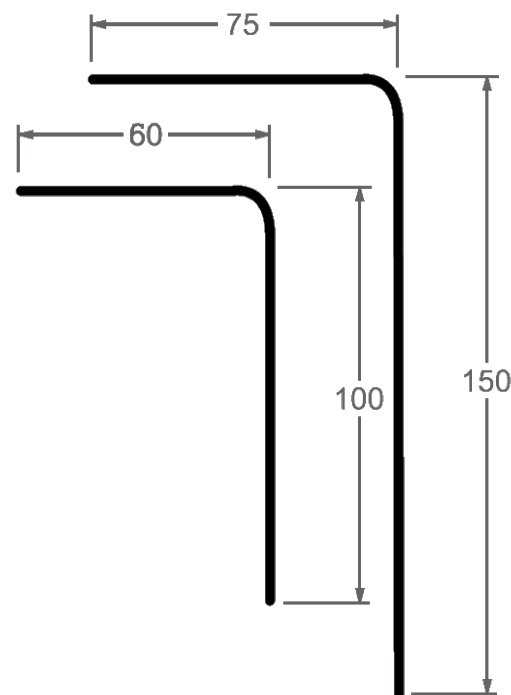

The trim will be available in **Black**. The black has no specific RAL colour, but the closest is RAL 9004.

Which waterproofing systems can the Water Check Trim be used with?

- LiquiTEC Roof and Balcony and Walkway Systems
- LiquiTOP Roof Systems

Stock & Lead times

Lead times on orders are approx. 5 working days.

Pricing

The trim range will be added to the next version of the price list for LiquiTEC and LiquiTOP cold liquids.

GRP Trim Angle 100/60 = £8.14 per linear metre

90° Internal/External Corners* £9.23 each

GRP Trim Angle 150/75 = £10.00 per linear metre

90° Internal/External Corners* £9.62 each

Prices exclude VAT

Trim available in packs of 10. Packs can be split.

***Internal/External corners available individually to suit the trim orientation.**

Technical Data Sheet

The Technical Data Sheet is attached with this update and is also available upon request.

Specifications & Drawings

The specification clauses and detail drawings have been updated and specifications using the new trim will start to appear after we have launched.

Fixing and face fixing trims

Fixing: 30mm from ends and at 300mm (maximum) centres, stagger fixed. *Can be used to retain the carrier membrane where it is taken to the full extent of the detail – please see Bauder detail drawing.*

Health & Safety

Information regarding handling, storage and disposal of this product can be found on the latest version of the Technical Data Sheet, which should be consulted before use.

If you have any questions, please do not hesitate to contact me.
