

Contractor UPDATE

Date: October 2021
No: 202110

New Thermofol Walkway Membrane

We are introducing a new improved Thermofol Embossed Walkway Membrane.

This is a 2mm reinforced product with a distinctive emboss providing a greater slip resistance than our previous PVC walkway membrane.

Thermofol Embossed Walkway Membrane will be supplied in the following format:

- **Thickness:** 2mm
- **Roll Size:** 0.75 x 20m (270m²/Pallet)
- **Roll Area:** 15m²
- **Weight:** 2.2kg/m²
- **Roll Weight:** 33kg

Our existing Thermofol Walkway Membrane will remain available for your secured projects for the remainder of 2021 at which time it will be discontinued.

The new Thermofol Embossed Walkway Membrane is available from October '21 from UK stock.

The colour of the new Thermofol Embossed Walkway remains the same as the previous walkway; the roll size, width and weight also remain the same. The surface of the new embossed walkway is visibly 'lifted' which provides the greater slip resistant finish.

Due to this significant upgrade, mixing both new & old walkway membranes on the same project should be avoided.

It would assist us greatly when placing your orders for Thermofol Walkway over the next couple of months if you can state whether it is the new Thermofol Embossed Walkway or the previous Thermofol Walkway.

The new Thermofol Embossed Walkway list price is £ 21.62m². Please find attached a revised version of the October price list. Discounted prices will be available via your local area managers.

Contractor Update cont...

It has been considered that you may have secured projects based upon using the previous Thermofol Walkway that have not yet started on site. We would ask that if this is the case, please can you let our Sales Dept know so that we can ensure we reserve the stock you will need and can supply this when you require it.

As mentioned the standard Thermofol Walkway is being discontinued from January 2022 so we can only be sure of supplying it after the New Year if we are made aware before Xmas. For these projects please discuss the price with your local ATM.

Your assistance is appreciated during this transition to the new and improved Thermofol Embossed Walkway Membrane.
