LiquiTOP Self Generated Projects

LiquiTOP prices and guarantees for self generated projects

Bauder are please to announce a scheme to allow Selected Approved LiquiTOP Contractors to use a standard discount on LiquiTOP products and obtain a product or back-to-back guarantee for their own projects that have not been specified by Bauder.

How does the scheme work?

As a selected Approved Contractor, you will receive a Quote with the discount rates for the LiquiTOP range of products. These rates for materials can be used on your own non-Bauder specified projects. Orders can be to stock or direct to site. You can also request a product or back-to-back guarantee to complement your own workmanship guarantee.

Does the discount rate cover other Bauder materials?

Only the LiquiTOP products themselves will be at the special discount rate. (LiquiTOP PU, LiquiTOP Glass Fibre Mat, LiquiTOP General Purpose Primer, LiquiTOP Epoxy Primer, LiquiTOP Reactivation Primer, and LiquiTOP PVC Primer)

For any other Bauder products, such as AVCLs, insulation, adhesives, etc., you will need to agree any discounts with your Area Technical Manager.

What guarantees are available?

Product or back-to-back guarantees can be requested for 15 or 20 years without the requirement for a material verification visit for projects up to 100m².

If the project is more than 100m², a material verification visit will be required. This can be achieved by including the start date on the Guarantee Request Form and submitting the form before the project is on site.

The Guarantee Request form is also attached to the accompanying email, please follow the instructions on the form to request the guarantee.

For projects that fall outside these conditions, for example where a higher-level guarantee is requested, please contact your Area Technical Manager for a project specific specification.

How long will the quote be valid?

Quotes will be sent from the Bauder Sales Office and will be valid for 6 months from the issue date.
