

Contractor UPDATE

Improved Parapet Outlet

To assist in reducing the number of parapet outlets required per roof area

Bauder are pleased to announce as part of its continued commitment to provide a comprehensive set of waterproofing accessories, the BauderTHERMOFOL letterbox outlet has recently undergone significant enhancements to improve its durability and flowrate.

The new and improved BauderTHERMOFOL letterbox outlet is available from the beginning of July 2024:

BauderTHERMOFOL PVC Letterbox Parapet Outlet DN 205 including stainless steel leaf guard. This product is supplied as standard with a stainless steel leaf guard and an anthracite colour flange.
Part number GB14120320.

The spigot has been upgraded from polypropylene to stainless steel; this will provide additional strength once installed and more protection during transit to site.

This new PVC compatible letterbox outlet also has an improved flow rate of **2.02l/s (35mm head of water).**

Furthermore these improvements have resulted in a reduction in the production cost of this unit which we are passing on resulting in a new list price for the outlet & leaf guard of £376.55 (a saving of 15%).

This upgraded letterbox outlet has a spigot length of 600mm. The spigot will fit into most typically sized 250mm hoppers.

The membrane flange on this product is fully compatible with BauderTHERMOFOL waterproofing membranes and will therefore form part of the Bauder warranty that includes the waterproofing junction.

The letterbox outlet, complete with leafguard, will be delivered in a cardboard box.

Parapet Outlet Pricing

This upgraded product will be included within the next Thermofol price list update, but can be purchased with immediate effect. Please contact your local ATM or the Bauder Sales Dept for prices.

Drainage calculations

Bauder Technical Department can carry out drainage calculations when using Bauder outlets to determine how many Bauder outlets are required per roof area.

Technical Data Sheets and detail drawings

The new Technical Data Sheet and detail drawing for these products are attached with this Contractor Update.

If you have any questions please contact your local ATM or the Bauder Technical Dept.
